

WEEK:- 13

Topic: Invoice Analysis, OCR Validation, Extraction of Accounting Fields, and Preprocessing

Objectives:

To analyze invoice documents, validate OCR-generated results, extract important accounting fields, and perform preprocessing techniques for accurate data extraction and automation.

Learning Outcomes:

- Learned invoice structure analysis and document understanding techniques.
- Understood OCR validation and data accuracy verification processes.
- Gained knowledge of extracting accounting-related fields from invoices.
- Developed skills in document preprocessing and data cleaning.
- Improved understanding of automated invoice processing workflows.

WORK SUMMARY:

During Week 13, I worked on invoice analysis, OCR validation, extraction of accounting fields, and preprocessing. The training focused on understanding how business documents can be processed automatically to extract meaningful financial information. I attended technical sessions and participated in practical exercises involving different invoice formats and layouts. Various invoice samples were studied to identify important fields and understand the challenges associated with extracting structured information from unstructured documents.

Throughout the week, I gained practical experience in validating OCR results and ensuring the accuracy of extracted data. I learned how to identify and correct recognition errors, improve extraction quality, and handle variations in invoice formats. Special emphasis was placed on extracting critical accounting fields such as invoice numbers, dates, supplier details, tax information, and total amounts. I also worked on preprocessing techniques to enhance document quality before extraction, resulting in improved OCR performance and reliability.

The activities carried out during this week strengthened my understanding of document automation and intelligent data processing. Regular testing, troubleshooting exercises, and mentor guidance helped me develop analytical thinking and attention to detail. The knowledge and practical experience gained during this week contributed significantly to my understanding of automated accounting systems and prepared me for advanced AI-driven document processing projects.

Activities Performed:

- Analyzed invoice documents and validated OCR-generated outputs.
- Extracted accounting fields and performed preprocessing for improved accuracy.
